## PROFESSIONAL SUMMARY

I'm a Computer Science student and a **full stack developer** with one year of experience building **web** and **mobile applications**. Proficient in **Java**, **Kotlin**, **JavaScript**, and **React**, I work with engineers to deliver technical solutions. A resourceful and proactive problem-solver with a strong foundation in core development principles and a keen eye for improving engineering processes. Eager to apply skills in a challenging software engineering role.

## WORK EXPERIENCE

Technical Writer

Clover Network, LLC

Sept 2024 — Present  
Sunnyvale, CA

- **Authored** and **maintained** comprehensive documentation for third-party developers, which improved **developer experience** and streamlined integration processes for mobile SDKs and e-commerce features.
- **Developed** and **automated** documentation maintenance scripts using **GitHub Actions** to proactively find and resolve issues like broken links, improving overall site integrity by **95%**.
- **Collaborated** with engineering groups in an **Agile** environment to ensure technical accuracy and clear documentation for new features and product releases.
- **Migrated** legacy documentation to a **GitHub repository**, which enhanced **version control** and fostered collaborative updates with development groups.

Laboratory Technician

UL Solutions

Apr 2022 — Sept 2024  
Fremont, CA

- **Performed** extensive **safety tests** and **data analysis** on a wide range of electronic devices, including servers and prototypes from companies like **Microsoft**, **Google**, **Meta**, and **Apple**.
- **Maintained** meticulous online laboratory records and documentation, ensuring all test procedures met strict **industry standards**.
- **Collaborated** with engineers to **troubleshoot** product issues and **validate performance**, which helped lower the product defect rate by **15%**.

## SKILLS

|                       |                                                       |
|-----------------------|-------------------------------------------------------|
| Programming Languages | Java, Kotlin, JavaScript, HTML, CSS                   |
| Frameworks            | ReactJS, Next.js, Jetpack Compose, Node.js, Bootstrap |
| Developer Tools       | Git, GitHub Actions, TypeScript, Retrofit, JUnit      |

## PROJECTS

Portfolio-site (github.com/AntonyPerez0/Portfolio-site)

Jul 2025 — Present

- **Developed** a professional portfolio site using a modern tech stack of **React**, **Vite**, and **CSS Modules** to showcase full-stack development skills.
- **Architected** a **component-based**, modular codebase to ensure a scalable and maintainable application.
- **Implemented** a **CI/CD pipeline** using **GitHub Actions** for continuous deployment, automating the build and deployment process.
- **Ensured code quality** and **reliability** by incorporating a full suite of tests with **Vitest** and **React Testing Library**.

## EDUCATION

|                                                                     |                    |
|---------------------------------------------------------------------|--------------------|
| Bachelor of Science, Computer Science, Western Governors University | May 2025 — Present |
| Computer Software Engineering, Multiverse Bootcamp                  | Sept 2024          |
| Course in Full Stack Web Development, Altcademy                     | Apr 2024           |
